OBD2 Products from Other Companies
e.g.)OBD2 adapter for a radar detector etc.

Only one product listed in ③ can be installed in one car.

List of Possible Combinations

The following shows a list of the possible combinations in which OBD2 products can be used. Our "OBD2 Wiring Kit" (sold separately) not only makes installation simpler, it also allows the user to combine products from different companies. (Some combinations are not possible)

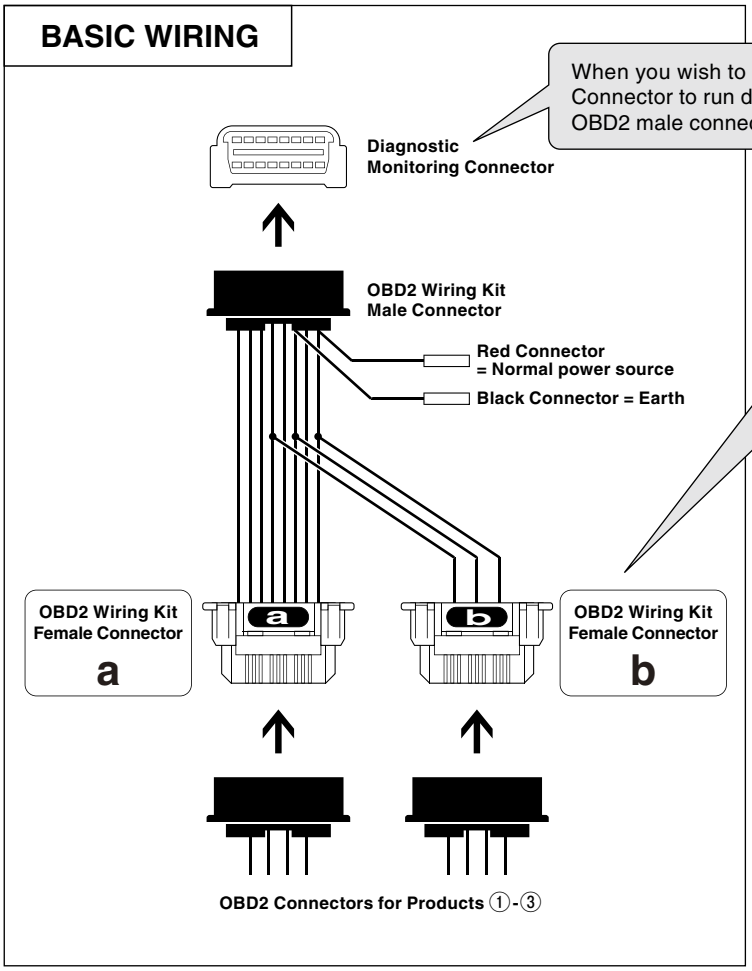
*When using in combination, each product must be of the type for that model of car.

Product Combinations	Possibility with OBD2 Kit
①+②	Yes
①+③	Yes
②+③	Yes
①+②+③	Yes (NOTE 1)
③+③	No

NOTE 1 ② is connected by connector.

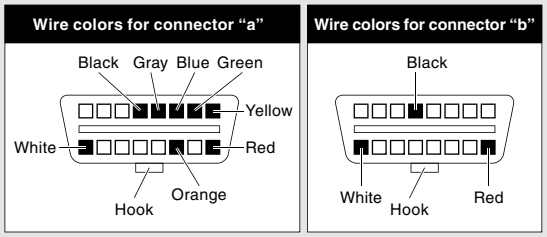
CONNECTING THE WIRES

BASIC WIRING



When you wish to use the Diagnostic Monitoring Connector to run diagnostic tests, disconnect the OBD2 male connector and run the tests.
Diagnostic Monitoring Connector
OBD2 Wiring Kit Male Connector
Red Connector = Normal power source
Black Connector = Earth
OBD2 Wiring Kit Female Connector a
a
b
OBD2 Wiring Kit Female Connector b
OBD2 Connectors for Products ①-③

There are two types of OBD2 female connector; check which one you have before carrying out any work.



【View of connectors from terminal side】 □ = Empty

*When wishing to connect OBD2 products from other companies, make sure that the terminals are in the same positions. If any of the terminal positions are empty and do not match, that product cannot be installed.

Combinations for Connected Products

Product Combinations	Connector "a"	Connector "b"	Red or Black connector
①+②	②	①	Not used
①+③	③	①	Not used
②+③	③	②	Not used
①+②+③	③	①	②
